- Strategically placed IaaS, SaaS, and PaaS solutions for enterprises based on their needs.
- Managed and supported existing customers while acquiring and onboarding new ones.
- Developed and implemented new operational workflows to optimize processing times in internal departments.

Education

Web Development Bootcamp, *Spiced Academy GmbH*

11/2022 – 01/2023 | Berlin, Germany

- Intensive, project-based course focusing on JavaScript, HTML, and CSS.

Stack: *React, React Native, Vue.js, Node.js, TypeScript, Node.*

Bootcamp's projects: *(Click titles for related project article)*

Bold - *React Native, Node.js* [↗](#)

A fitness tracking mobile app that allows users to scan food product barcodes to display macronutrients, track body metrics, set notes and reminders, and get recipe suggestions. The metrics page displays total macronutrient intake for the day.

Social Network Platform - *React/Redux, Node.js, PostgreSQL* [↗](#)

A social network platform with features like creating profile pages, updating bio and profile picture, adding, rejecting or accepting friend requests. The backend allows users to register, save their information, edit profiles, and reset or change passwords.

Imageboard - *Vue.js, Node.js, PostgreSQL, AWS* [↗](#)

An anonymous image board where users can upload pictures, add comments, and like photos. The app is fully responsive and utilizes AWS bucket for image hosting.

UX/UI Design Bootcamp, *Ironhack GmbH*

01/2022 – 03/2022 | Berlin, Germany

- In-depth coverage of the foundations of design principles and design thinking
- How to build empathy with users, create user personas and flows, and incorporate UX writing and storytelling

Bootcamp's UI projects: *(Click titles for related project article)*

Bold - *Fitness Tracking Mobile App* [↗](#)

Till Van Loosen - *Professional Photographer Website* [↗](#)
